

# Water Well Dowsing with Susan McNeill Spuhler

Ozark Research Institute, Power of Thought School

September 5, 2022

Before you dowse a wellsite, have your customer find out the following information from their Health Department or Planning Dept.

If you are going to dig your own well, you'll need a permit.

## You will need to know the Distance from

Structure (house/barn, etc.)

Property line

Street

Septic

Wetlands

Underground gas or electric lines

Overhead electrical lines

Other wells on the property

## What I ask for when dowsing a well site

Potable Water

Tastes Good

Smells Good

Is there year round

Appropriate Depth

Appropriate gallons per minute

Easy for the well driller to get to

Beneficial to all who drink it

Primary water

Appropriate Place & vein direction

Ask the Spirit of Water for Permission to dowse the property. Make an offering of Corn Meal or organic tobacco; you may want to use sage to clear the land. Dowse this.

Susan McNeill Spuhler 978.340.9304 [susan.mcneill.spuhler@gmail.com](mailto:susan.mcneill.spuhler@gmail.com)

## Tools I use to find a wellsite

Map of property from customer or their town or city, ruler, pencil

Pendulum for Map Dowsing

L-rod to find the edge of a water vein

Y-Rod to find the exact spot

Surveyor Marker Spray paint (I use Pink or Orange Krylon for visibility)

Surveyor Marker Flags or wooden stake with surveyor's tape to mark the spot

300-foot-long measuring tape

Sage, Organic Tobacco, Corn Meal to clear and honor the land and the Spirit of Water

Unless you charge people for dowsing their well, they won't appreciate what you tell them. Some energetic exchange needs to happen whether it's money, an item, farm vegetables or you barter a service. I make my own L-rods, Y-rods, and Bobbers. I teach my customers how to dowse and give them dowsing tools to keep. I will map dowse the property prior to my arrival so as not to waste any time. Having a customer be a part of the water seeking experience is important as this is their water and water is life.

Always trust your intuition. It will save your life.
